GENERAL INDEX TO VOLUME 86

JANUARY–DECEMBER, 1942

January	**Pages 1–74**
February	" **75–150**
March	" **151–222**
April	" **223–298**
May	" **299–376**
June	" **377–458**
July	" **459–536**
August	" **537–614**
September	" **615–694**
October	" **695–772**
November	" **773–852**
December	" **853–928**
Mid-December	" **929–990**

A

ACCIDENTS AND ACCIDENT PREVENTION

Examine all valves before entering idle boiler in battery ... 323
"Low pressure" doesn't necessarily mean "safe" in a boiler. A. F. Norcross ... *740
Midland explosion evidence. William Doran ... *434
Safe ramps for coal handling walkways. W. E. Rossnagel ... *57
Soldered joints ... 192

AIR COMPRESSORS

About air compressors ... 674
Additional receivers increase compressed-air capacity. C. A. Armstrong ... *503
Centrifugal-compressor fundamentals ... *27
Cosmetic manufacturer uses compressed air to process dry ingredients. S. M. Dunham ... *890
Metropolitan Life building is served by compressed air ... *180
Oswego station, Niagara Hudson system, uses compressed-air soot blower ... *2
Rotary compressor operation ... *129
Ten rules for safe air-compressor operation ... 265
Trouble with compressor. G. L. Hess ... *743
Two-stage compressor operates on high pressure steam in low pressure cylinder. A. J. German ... *110

AIR CONDITIONING

Bomber assembly plant is world's largest air-conditioned structure (picture feature) ... 331
Cooling diesel jacket water. G. C. Boyer ... *79
Metropolitan Life Insurance Co.'s air conditioning installations (picture feature) ... 253
Metropolitan Life Insurance's air-conditioning system meets office-building needs ... *234
Metropolitan Life Insurance new office building installs large air-conditioning system ... *802
Priorities for air conditioning ... 355
Summer wet-bulb temperature (map) (Power's Data Sheets) ... 135

AIR RAIDS

Bomb protection of the boiler room. I. M. Gorrie ... *348
Bomb sandbags block air intake ... 157
Concrete bomb shelter. J. C. Albright. *811
Great Britain maintains generating plants in the blitz. Sir John Dalton ... *892
How to fight the fire bomb (supplement) May
Industrial plant protection ... 18
Lets guard against interruptions. W. F. Thompson ... 109
McGraw-Hill protects elevator machines from water damage ... *648
American Society of Mechanical Engineers—Cleveland meeting ... *472
New York meeting ... *963
American Society of Refrigerating Engineers—St. Louis meeting ... 74b

AWARDS

Anderson medal goes to Dr. F. E. Giesecke ... 295c
Army-Navy E awards ... 519; 849a; 921c
Bessemer medal awarded to E. G. Grace ... 134
Fritz medal awarded to Willis Whitney. 923c
Grimshaw medal awarded to Ernest Thomas ... *595
Hoover medal award ... 926a
Hydraulic Institute awards ... 74a
Lamme medal awarded to F. E. Ricketts ... 296c
Percy Nicholls award to E. G. Bailey ... *801
Power wins two editorial awards ... *753

B

BEAMS

How to figure beams. Phil Swain ... pt. 1, *513; pt. 2, *588; pt. 3, *668; pt. 4, *746; pt. 5, *826; pt. 6, *904

BEARINGS

ASTM lists emergency babbitts and solders ... 578
Anti-friction bearings kept rolling by adequate lubrication. J. I. Clower ... *38
Bearings and relays. Fred McCormick. 333
Bonding high-lead babbitt to cast iron. *729
Cageless roller bearings. Geo. Holman ... 566; Emil Wittman *730
Cast-iron bearings. Samuel Marano ... *334
Does remelting injure babbitt metal? Wyrough, Mullen, Cunningham, Relef 514
Emergency bearings — including wood. Martin Gozdenovich ... 489
Emergency roller bearings ... *422
Fighting the battle of bearings ... 250
Homemade thrust bearing. Geo. McNally ... *566
How to babbitt a sleeve bearing ... *203
How to "roll your own" ... *336
Laminated-plastic bearings accomplish savings. V. E. Enz ... *405
Made his own castings. K. M. White ... 333
Melting metal for bearings. R. E. Osgood ... 487
Oil groove location. L. C. Bryant ... 334
Pipe fitting bearings. J. M. Kurlian ... *824
Relining bearing by centrifugal casting process. H. Doughty ... 647
Relining bearings. M. N. Gozdenovich ... 334
Roller bearings are easy to make. George Holman ... *405
Roller bearings for 1800 rpm. H. E. Osgood ... *567
"Secondhand" babbitt. G. M. Hardy ... *490
Silver improves lead-base babbits. Gillett & Dayton ... *564
Substitutes for tin in bearings. Willi, Hallett, Swarta, Karelitz, Clower, Gillett ... *318
Wooden bearings to replace metal. E. A. Earle ... 406
Your bearings "keep 'em rolling." Phil Swain ... 333

BELTS

Combination flat-belt tightener and deflector. S. M. Elonka ... *123
Flat leather belt selection and application. R. B. Heller ... *898
How to align line shafting. Bradley, Barrett, Holman, Gozdenovich, Chamberlain, McNally, Cunningham ... *672
How to cut flat belts square ... *589
How to lay out holes in belts ... *669
Making rubber goods last longer ... *378
200 ways to make leather belts and packings last longer. F. A. Annett ... *466
V-belt service factors (Power's Data Sheets) ... 210
V-belt tension. Spencer, Bradley, Adams, Gozdenovich, Bachmann, McNally ... *119

BOILERS

A.S.M.E. discusses boiler problems ... 472
Argentine power plants use surplus grain for fuel ... *538
Blows sludge from heat-exchanger coils. S. H. Coleman ... *511
Boiler-feed pump. Karassik, McNally, Hetherman, Curry, Wright, McDonald ... *275
Boiler-feed-pump troubles. Paterson, Eastcott, Chamberlain, Maes, Kristal, Barrett, Geiger, Holman, Clark, MacDermod, Estlick, Webber ... *592
Boilers converted to water heaters. L. A. Corwin ... *185
Breaking in the new hand. I. W. Dudley ... 811
Buying a secondhand boiler. Harry Spring ... *506
Changes in oil burners increase CO_2. P. E. Merideth ... *427
Check these. I. W. Dudley ... 568
Cleaning boilers. Dan Gutleben ... *191
Clean boiler tubes with water from hose. Alex Gray ... *270
Colorimetric test for phosphates. G. A. Johns ... *112
Continuous-cleaning grate extends spreader applications. R. L. Beers ... *972
Control valve shifted to save water and fuel. R. Boettinger ... *345
Corrosion attacks and treatments. William Maddock ... *116
Dick and Andy and the upside-down boiler. J. W. Hays ... *820
Disposal flume for boiler wash water. J. C. Albright ... *666
Draft systems. S. A. Tucker (More power from existing equipment) ... *75
Embrittlement facts. Schroeder & Berk ... *575
Emergency oil heater for starting up cold boiler when no other steam is available. R. Boettinger ... *252
Escape pipes on safety valves should be provided. C. R. Anderson ... 50
Examine all valves before entering idle boiler in battery ... 323
Explosions in furnace prove mystery until manager uses his nose ... 117
Fighting coal-bunker fires. Dan Gutleben ... *44
Firing truck improves boiler operation. R. B. Allen ... *901
Five practical ways to measure liquid level ... *553
Flowmeter record reveals steam waste. S. D. Distelhorst ... *426
Forced-circulation boiler. Clark, Rosencrants & Armacost ... *965
Gage-glass life extended. Leslie Bradley ... 52
Gage-glass-reading helped by miror. C. C. Lynde ... *509
Gage gass visibility improved. G. M. Hughes ... *345
High-water alarm for steam separators. R. O. Billings ... *421
Home made equipment in a boiler plant. E. J. Duff ... *567
How to choose among heater drain recovery systems. Karassik & Spining. *226
How to install boiler tubes. E. J. Duff ... *817
How to remove boiler tubes. E. J. Duff ... *827
Industrial plant finds automatic boiler-control system "keeps 'em rolling." C. R. Earle ... *246
Lamps for boiler inspection. Oliver Rantanen ... *825
Leaky nozzle flanges. John Gorrie ... *45
Liquid level in gage glass silhouetted for better visibility. P. E. Meredith ... *587
Low-level alarm for stoker hoppers. S. M. Elonka ... *510
"Low pressure" doesn't necessarily mean "safe" in a boiler. A. F. Norcross ... *740
Making deaerating heaters suit plant cycle. W. P. Spining ... pt. 1, *717; pt. 2, *786
Marathon Paper takes fifteen steps to increase boiler capacity. G. H. Urban ... *711
Maximum output from existing boilers. E. G. Bailey ... *324
More steam from the boiler! (Power's Data Sheets) ... 63
Oil in boilers caused by new piping. S. H. Coleman ... 125
Operating hints on getting more steam from your boiler. Harry Spring ... *41
J. O. G. Gibbons *341
Oswego station, Niagara Hudson system, tests new two-unit one-boiler-per-turbine plant ... *2
Priorities bring innovations. G. P. Reintjes ... *578
Radium—modern tool for boiler inspection. Harry Spring ... *560
Rear arch improves underfeed-stoker operation. D. J. Mosshart ... *384
Rolling boiler tubes. Gorrie, Chamberlain, Estlick ... *593
Safety note ... 819
Salvaging old preheaters. J. H. Sengstaken ... *186
Scales still plague boiler operators (ASME) ... 969
Screen keeps bugs away from burners. J. C. Albright ... *586
Separate blowoff lines prevent valves clogging. R. C. Henderson ... *271
Separated boilers improve operation. E. MacDermod ... 407
Smaller gage glass replaces ¾-in. unit. Alex Gray ... *665
Somerset station, Montaup Electric, forced-circulation all-welded boiler (picture feature) ... 34
Step-up stokers for war loads. L. N. Rowley (More power from existing equipment) ... *167
Surface blowdown keeps oil from boilers. P. E. Meredith ... *424
Surface of boiler-tube expander. E. J. Duff ... 822
Suspended furnace walls give less trouble. G. P. Reintjes ... *248

(*) illustrated. (Ed) Editorial

R v.86 Ja-Ap 1942

Page

Test equipment for low-pressure gages. H. M. Naylor....*511
Test for oil in boiler water. S. D. Distelhorst 122
Test valves in trap discharge lines. Elliott MacDermod *425
Timken Roller Bearing erects new building to house additional boilers....*386
Trading steam creates more boiler capacity *637
Utility finds experience a guide when adding second topping unit.... ..*704
Water in air duct reduces boiler draft. James Burruss *508
Welding upper heads.... 434
X-ray fingerprints scale deposits. Imhoff & Burkardt.... *10

BOLTS

How to install foundation bolts. A. H. Korn *415
How to measure distances between bolt centers. E. MacDermod....*354
Bombs, see War
Brown, Boveri & Co. celebrates fifty years of pioneering. Phil Swain.... 73a

C

Cabinet for filing meter charts. C. C. Lynde *745

CABLES

Insert safety link in pulling medium. George Holman 193
Nurse your manila rope carefully. W. E. Rossnagel *393

CHIMNEYS

Wrong laps and corrosion ruin steel stack. Dick Snider....*823

COAL

Effective coal storage depends on "know how" *642
Fighting coal-bunker fires. Dan Gutleben *44
Fire hose sluices coal to emergency storage *816
Group to assist coal stockpilers.... ..848c
How to make emergency coal storage safe *640
Oil to coal in wartime....*696
Pivoted bucket conveyor handles three coal-moving jobs at Chicago municipal pumping station. W. G. Hudson.*243
Safe ramps for coal-handling walkways. W. E. Rossnagel.... *57
Trucks pile 20,000 tons 20 feet deep..*778
Utilities and industrials urged to store coal for possible shortage.....133; 209
Combustion—bomb sandbags block air intake 157
Compressed air—compressed air pipe friction. H. Gartmann (Power's Data Sheets) *281

CONDENSERS

Air-cooled condenser solves feedwater problem. J. C. Albright....*654
Air evactor holds condenser prime. G. I. Smith....*825
Choose one pump or two for condenser applications. H. R. Mueller....*475

CONTROL

Automatic control insures process-steam reliability. C. R. Earle....*784
Automatic load control keeps power systems in step....*628
Correct electrical protection makes interchange safe *630
Cutler Hammer finds duplex pump control spells flexible operation. W. H. Costello *499
Governing turbine pressures. Raymond Sheppard ....pt. 1, *82; pt. 2 *155
Hydraulic and electric control for vertical pumps of high-lift Newport Station. J. G. Davis....*813
Industrial plant finds automatic boiler-control system "keeps 'em rolling." C. R. Earle....*246
Industrial-plant operators share "tie-in" experience *624
Instruments used to check turbines. W. W. Johnson....*396
Metering flow. F. A. Annett....*87–106
Metropolitan Life Insurance air-conditioning system supervised by streamlined signals *802
Rectifier in field circuit improves motor control. L. E. Miller....*733
Selection and application of pump-motor-control equipment. H. W. Costello *7
War means your refrigerating system must produce more "cold." Terry Mitchell *796
Which governor suits your turbine load? Fischer & Bryant....*231

COOLING TOWERS

Cooling diesel jacket water. G. C. Boyer *79
Low-pressure condensing turbine-driven generator with cooling tower for steam and power, New York....*113
Summer wet-bulb temperature (map) (Power's Data Sheets).... 135

COSTS AND PERFORMANCE

Hallettsville, Tex. makes a success of its diesel lighting plant....*238

Page

Marathon Paper doubles output with boiler-room changes. G. H. Urban..*711
Ponca City, Okla. electric plant diesels record ten years of 7-mill power....*322
Richmond's municipal plant's three-year record shows low stoker maintenance. H. C. Carroll....*502
University of Idaho expands heating plant with improved efficiency. H. F. Gauss *222
Washington Life building, N. Y. gives a good account of itself after 45 years operation 419
Council of Electric Operating Companies formed 297b

D

Draft systems. S. A. Tucker (More power from existing equipment).... *75

E

Edwards, George—America is at war..... 65
Brains vs. brawn.... 439
Bumblebee 915
Christmas, 1942 975
Every drop 837
For want of a nail.... 211
Shut up! 757
Sore as— 137
The strength of our nation.... 523
Too little—too late.... 283
Use for Methuselah.... 679
Will to win.... 357

ELECTRICITY

Air circuit breaker operated by compressed air *911
Air-cooled transformer ideal for underground work 294c
Armature testing *347
Automatic load control keeps power systems in step....*628
Automatic voltage regulators improve kilowatt quality. A. M. Shong....*229
Ball of twine anchored to ceiling for wiring use *900
Better electrical distribution (Ed)..... 151
Brush connections source of trouble. L. R. Cary 824
Brush wear in motors. LeQuesne, Cunningham, Murray, Bachmann, Ayers, Mullen *196
Brushes remove armature-coil-lead insulation. G. O. Rowland....*664
Busbar changes insure lighting power for station. E. R. Webber....*425
Cable damage. Simons, Schomoker, McNally *118
Can your motors carry the load? A. F. Lukens *542
Capacitor cuts peak loads. C. P. Fisher, Jr. *268
Circuit breakers—three types using compressed air (A.I.E.E. paper)..... *24
Commutator resurfacing *272
Correct electrical protection makes interchange safe *630
DeLaval Steam Turbine plant provided with storage batteries for emergencies *389
Direct current brush installation....*747
Dissolved insulation removed. A. A. Schulke 335
Divided load solves parallel problems. E. R. Weber.... 125
Don't always blame the voltage regulator. A. M. Shong.... 584
Electric drive merchant ships (picture feature) 805
Failure of magnetic separator. Clark, Riggs, Wood, Nutter, Hughes....*430
Four industrial-plant electric power-distribution systems compared....*152
Fuse identification method. R. O. Spencer 666
Fuses made available for immediate use. J. F. MacGowan....*508
Grounding the frames of machines operated on extension cords. R. Boettinger *822
How to band an armature....*428
How to change commutator leads....*512
Hydrogen for high-frequency cooling...*107
Industrial-plant operators share 'tie-in' experience *624
Interconnection puts more load on circuit breakers *632
Load-center distribution systems save strategic materials *205
Loose armature core breaks coil leads. R. O. Spencer.... 510
Low-pressure condensing turbine-driven generator serves for both steam and power, New York City....*113
Mechanical mole goes through long conduit. G. L. Hess....*51
Metropolitan Life Insurance's air-conditioning system supervised by streamlined signals *802
Moisture-free air essential to efficient breaker operation. Carl Thumin....*240
More life from gearmotors. H. W. Bennett *20
More production with less kilowatts. E. W. Feller (More power from existing equipment) *495
Motor commutation is affected by many things. R. R. Richart....359a
Motor-generator sets overheated cooled. Forbes & Brown.... 111
Motor speed adjusted to obtain efficient operation. A. F. Hartung....*789

Page

Motors for power-plant pumps to meet special requirements. K. M. Patterson *714
Motors, synchronous, hard starting improved by part-winding method. L. W. Ballard *656
Overmotoring almost a crime, says Umansky 920c
Polarity affects brushes. Nathaniel Pasarell *434
Power factor improved, troubles are cured in industrial plant. R. O. Cummings 342
Power pooling introduces new metering problems *635
Power pooling to provide standby capacity *734
Problem of the exciters. Smith, Webber, McNally, Bachman, Riggs..... *46
Pump-motor control equipment selection and application. H. W. Costello..... *7
Rectifier in field circuit improves motor control. L. E. Miller....*733
Secondary-network systems serve high-production power loads. H. D. James.*326
Silver plating cools circuit breakers.... 252
Slipring insulation source of trouble. H. W. Hodgson....*268
Special load resistor speeds diesel testing. R. D. Ketner.... *53
Storage battery corrosion stopped by proper ventilation. C. R. Anderson..*902
Stretch nameplate kilowatts to speed war production. F. A. Annett (More power from existing equipment).....*255
Switch contacts repaired. H. E. Osgood 647
Tennessee Valley Authority generating capacity now 1,043,670 kw....150c
Test set serves three voltages. Kenneth Collins *197
Transformers—paint removed from transformers by the hot-solution method. A. P. Schulze....*304
Transformer substation protected by high barrier *228
Trick hookup replaces centrifugal switch. A. A. Schulke....*407
Turbine-electric ships speed oil to mechanized armies *792
Utilities must interconnect with private-plant generators 435
Violet-ray device tests extension-cord insulation. T. W. Lawson....*823
What makes meter swing? Jennings, Bachmann, Corrigan, Clark, Avis, Bender, McNally, Mullen.... 748
Wound rotor changed to squirrel cage. R. O. Spencer.... 900
Elevators—McGraw-Hill protects elevator machines from water damage.....*648

ENGINEERS

Consultant attacks "sloppy operation".. 251
Consulting engineers 408
From stationary steam to marine engineer. F. V. Smith....*737
How about sloppy consulting? H. P. King 408
Reminiscences about the old chief. William Doran.....pt. 14, *37; pt. 15, *86; pt. 16, *166; pt. 17, *237; pt. 18, *330; pt. 19, *392; pt. 20, *474; pt. 21, *569; pt. 22, *658; pt. 23, *726; pt. 24, *795

ENGINES—DIESEL AND GAS

Automobile ignition parts revamped for gas-powered compressor. W. W. McClow *886
Automotive engine for stationary power—control extension. G. M. Wilson...*123
Better cooling for gas-engine cylinders. Golem, Bachmann, McNally, Maher..*515
Brooklyn, Iowa, municipal diesel plant carries light loads and saves two larger units. C. M. Stanley....*482
Butane gives high heating value, low cost at Shiprock plant, N. M. J. F. Maher *132
Cooling diesel jacket water. G. C. Boyer *79
Diesel engine inspection. E. R. Spencer....pt. 1, *188; pt. 2, *263
Diesel engineers tell how to operate under war conditions.... 662
Diesel lubricating oil—how to judge used oil. S. S. Hansen.... *14
Diesel plants—how to design better plants (National Oil and Gas Power Conference) *546
Diesel ship developments....*970
Diesel 2-cycle engines make exhaust gas—turbine supplies kilowatts....*888
Diesel waste heat. Williamson, Bender, Bachmann, Hicks, Reger, Baker, Cunningham, Gorrie *349
Diesels for small-town America—Hallettsville, Tex. *238
Gas-burning diesels give fuel flexibility.*651
Gas-engine plant powers Fitts oil field.. *60
Gasoline-engine driven generator served by roof ventilator. C. C. Lynde....*742
How to get the most out of diesel and gas engines. L. N. Rowley (More power from existing equipment).....*411
How and when to pin piston rings. Holman, Gorrie, Cunningham, Bradley...*751
Ponca City, Okla. electric plant diesels record ten years of 7-mill power....*322
Rockville Centre installs 3,000-hp. diesel unit *774
Rockville Centre plant (picture feature) 808
Special load resistor speeds diesel testing. R. D. Ketner.... *53
Supercharging requires new diesel definitions. Ralph Miller (ASME).....*971
Turbocharging increasing capacity of four-cycle diesels. J. P. Stewart.....*708

(*) illustrated. (Ed) Editorial

Tech

Page

Two 4-cylinder magnetos fire 8-cylinder engine. J. T. McKinley....*487

ENGINES—STEAM

Condensing operation cuts steam rate 33%. R. E. Fontaine....*745
Connecting-rod angularity. C. B. Hudson....*594
Engine speed should be on nameplate. Lawrence Meharg....358c
Engine taps badly at all loads. McNally, Whisman, Webber, Daly, Clark, Greer, Holman....909
Engine will not release. Murray, Haworth, MacDermod, Webber, LeQuesne....*194
Finding engine speed. Floor, Daniels, Pef, Matthes, Ciotti, Maes, Parker....47
High-water alarm for steam separators. R. O. Billings....*424
His hobby helped the Navy....*727
One-cylinder old-time engine repaired. A. R. Ciotti....*488
Operating precautions for a compound engine. R. E. Fontaine....*903
Sluggish governor causes engine trouble. Anthony Greer....*201
Two-stage compressor operates on high pressure steam in low pressure cylinder. A. J. German....*110
What's wrong with this engine. Holman, Webber, Gorrie, McNally....*670
Entropy, meaning and use. Prof. E. S. Gray (diagrams)....*402

EQUIPMENT

Adjust-o-feeder....*282
Alarm, smoke....*140a
Arc-control station....841a
Babbitt substitutes....602b
Balancing unit....286c; 842b
